

Swarnali Roy

Senior Software Engineer · React Native · React · TypeScript

Dhaka, Bangladesh · swarnali.roy093@gmail.com · +8801644147173 · GitHub · LinkedIn · DEV Community

PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience building production-level mobile and web applications using React Native, Next.js, and NestJS. Skilled in cross-platform development, API integration, and performance optimization. Experienced in owning feature development, improving user experience, and managing app releases. Leverage AI-assisted development tools to accelerate delivery, debug complex issues, and improve code quality. Also, actively share technical insights through blogging on DEV Community, with 180K+ total views and engagement.

TECHNICAL SKILLS

Core: React Native, React.js, Next.js, TypeScript, JavaScript (ES6+)

Frontend & State Management: HTML5, CSS3, Tailwind CSS, Figma-to-code, Redux Toolkit, RTK Query

APIs & Backend: REST APIs, GraphQL, Node.js, NestJS, MySQL, PostgreSQL

Tools & Workflow: Git, CI/CD, Firebase, Vercel, Jira, Trello, Confluence, Agile/Scrum

AI Tools: Claude Code, ChatGPT-Codex, GitHub Copilot, Prompt Engineering

PROFESSIONAL EXPERIENCE

Software Engineer

Jan 2024 – Present (Remote)

Younode, Inc.

- Developed and maintained cross-platform mobile applications using React Native
- Translated Figma designs into pixel-perfect, responsive UI with strong UX focus
- Owned feature development and improved UI responsiveness, including follow and like animations
- Managed mobile app release cycles, including build generation, versioning, and deployment to App Store and Google Play
- Integrated monetization SDKs including AppLovin and Meta Audience Network for in-feed ads
- Built and integrated backend APIs using NestJS to support mobile features
- Leveraged AI-assisted development tools including Claude, Codex, and GitHub Copilot to debug issues and accelerate delivery
- Collaborated in Agile environment using Jira and documented processes in Confluence

Frontend & Mobile App Developer

Oct 2021 – Apr 2023

Codeware Innovations

- Built a React Native mobile application for a live sports news platform with real-time features
- Developed production web applications including a domain purchasing platform using Next.js, TypeScript, Redux Toolkit, RTK Query and a social web application with Instagram-like features using React, Redux, and WordPress
- Improved application performance and reliability through optimized component design
- Collaborated with backend teams for API integration and feature delivery
- Introduced Agile practices using Trello and documented processes in Notion

Freelance Frontend Developer

Jan 2021 – Sep 2021

Upwork

- Delivered web and mobile applications for international clients using React.js, React Native, and Redux

KEY PROJECTS

Pulp – Music Sharing Social Platform

React Native · Spotify API · AppLovin · Firebase

- Contributed as a React Native engineer and feature owner for a production-level social app available on App Store and Google Play
- Implemented responsive UI from Figma, ensuring smooth user experience
- Implemented core features including curated playlists from Spotify, unlocking listening history based on token count
- Contributed in rebranding the UI of the app
- Implemented in-feed ad monetization using AppLovin & Meta Audience Network
- Participated in release management and ensured smooth feature deployment

Sportsdemy – Sports News & Live Data Platform

Next.js · React Native · GraphQL

- Developed Next.js web app with GraphQL integration for real-time sports data

- Built React Native mobile app supporting live scores, match stats, and chat features
- Optimized frontend performance for high-frequency data updates and reduced unnecessary re-renders

Blood Bank App

React Native · Redux Toolkit

- Built a mobile application enabling users to search for blood donors and contact them directly
- Implemented a donor search and listing system with detailed donor profile pages
- Developed a complete authentication system including login, registration, and password recovery
- Built user profile management with edit/update functionality and profile picture upload
- Designed distinct home screen experiences for pre and post login states

Exam Taker App

React Native

- Built a mobile MCQ exam application with subject selection and a countdown timer per attempt
- Designed an interactive question card UI with horizontal swipe navigation between questions
- Developed a complete authentication system including login, registration, and password recovery
- Implemented a subject and question drawer with switchable List and Grid views
- Tracked question states visually by updating question number colors as they are viewed or answered
- Added star-marking to let examinees flag questions for review, reflected across both drawer views

HireCraft – Online Assessment Platform

Next.js · TypeScript · Tailwind CSS · Zustand · Vercel

- Built a role-based online assessment platform with separate Employer and Candidate panels. Live demo link: Hire Craft
- Developed candidate exam experience with timer, progress handling, and auto-submission logic

AI Automation Bots (Slack & Travel Assistant)

Claude Code · ChatGPT-Codex 5.3 · Github Copilot

- Developed AI-powered travel assistant (TripTailor - AI Travel Agent) for planning and flight booking
- Developed a Slack bot to automate daily team reporting workflows, reducing manual status updates
- Applied prompt engineering and AI-assisted development throughout both projects to accelerate delivery

EDUCATION

B.Sc in Computer Science & Engineering

Apr 2014 – Jun 2018

Ahsanullah University of Science and Technology (AUST)

CERTIFICATIONS

React Native — Coursera (Meta)

Introduction to Agile Development and Scrum — Coursera (IBM)

Introduction to Scrum Master Profession — Coursera (SkillUp)

Learn AI Agents — Coursera (Scrimba)

Frontend Developer (React) — HackerRank

LANGUAGES

English – Fluent (IELTS 7.5)

Bangla – Native
